EXPERIENCE

Green Schools Green Future, Toronto | *Volunteer Web Developer*

Dec 2023 – Present

- Spearheading the management of Green Schools Green Future's website, a voluntary initiative.
- Responsible for overseeing and enhancing the WordPress-based platform, incorporating React for a modern and dynamic user experience, using HTML, CSS, Javascript.
- Successfully resolved critical issues with the malfunctioning WPGive plugin, facilitating seamless online donation collection.
- Proactively addressed and solved persistent challenges within the plugin, optimizing its performance for efficient fundraising.

Supreme Court, Turkey, Ankara, Turkey | *Web Application Developer*

Feb 2013 – Oct 2016

- Responsible for all web projects and took part in the development and management of the projects.
- Developed the official website, implementing a robust Content Management System (CMS) using PHP for seamless CRUD operations.
- Designed and integrated a user-friendly interface with Javascript, HTML, CSS, Bootstrap allowing visitors to access news, announcements, and information about the institution, enhancing the overall user experience.
- Enabled users to perform efficient queries on legal cases through a custom-built system, enhancing accessibility to judicial records.

PROJECTS

Order Management - Website | *Javascript, Node JS, Express JS, React, Restful API, Git, GitHub, Render* August 2022

- Developed an innovative Order Management System enabling customers to place orders for existing products or create requests for non-listed items.
- Implemented a robust backend using Node JS, Express JS, and MongoDB to handle user authentication, CRUD operations, and facilitate statistical analysis.
- Designed a user-friendly frontend with React, incorporating technologies such as Bootstrap, Javascript, React Router Dom, Axios, React Query, JWT, and Redis for enhanced functionality.
- Enabled the company to receive and respond to customer requests, send quotes, and process orders, providing end-to-end visibility into the delivery process.
